ADITYA MISHRA

Full Stack Developer | B.Tech Information Technology
+91-7015691250 | adityamishrav820@gmail.com | Greater Noida, Uttar Pradesh, India
Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full-stack developer and B.Tech Information Technology student building web applications and AI-based projects with a focus on clean user experience and practical functionality. Interested in backend development, modern web apps, and learning new technologies.

PROFESSIONAL EXPERIENCE

Skypath Global | Full Stack Developer Intern
Remote | August 2026 – Present | Three-month paid internship

- **Ombreille:** Contributed to a multi-service website for aviation courses, hospitality courses, and real-estate services, including property listings, online property workflows, and an admin panel.
- **EduPulse:** Contributed to an educational platform presenting academic and professional program listings.
- Participated in real-world web application development across user-facing and platform features.

EDUCATION

Gautam Buddha University | B.Tech Information Technology | 2024 – Present
New Lahoria Sr. Sec. School | Class XII: 78.80% (2023) | Class X: 93.66% (2021)
Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

SKILLS

Programming: Python, Java, C, JavaScript
Frontend & Backend: HTML, CSS, Bootstrap, React, Node.js, Express.js, FastAPI
Databases & AI/ML: MongoDB, Qdrant, Redis, LangChain, LangGraph, OCR, RAG
Tools: Git, GitHub, VS Code, Docker, Postman, Figma
Spoken Languages: Hindi (Native), English (Professional Proficiency)

PROJECTS

DocsMind | FastAPI, React, Qdrant, Redis, OCR, LangGraph | Live Demo

- **Problem:** Finding specific answers in long, scanned, or unstructured documents is slow and manual.
- **Solution:** Built a document analysis platform that combines 4 techniques (OCR, document chunking, hybrid retrieval, and RAG) to return context-aware answers from uploaded files.
- **Key features:** Streaming responses, source citations, and document preview for verifiable answers.

CampusPool | MongoDB, Express.js, React, Node.js, JWT | Live Demo

- **Problem:** Informal campus ride sharing makes trips hard to coordinate and riders hard to trust.
- **Solution:** Built a student ride-sharing platform with 3 layers of secure access (JWT authentication, role-based access control, and student verification) to keep it limited to the campus community.
- **Key features:** Live ride updates and real-time matching using Socket.IO and Google Maps API, with REST APIs and responsive React interfaces for booking, trip management, and notifications.

ExtensionGuard | React, TypeScript, Fastify, PostgreSQL, Redis, Playwright | Live Demo

- **Problem:** Browser extensions can hide malicious behavior behind broad permissions and are hard to vet.
- **Solution:** Built an auditing platform with a 5-stage pipeline (safe ingestion, static AST analysis, sandboxed execution, LLM purpose check, 0–100 risk score) for Web Store links or uploaded archives.
- **Key features:** Detects 50+ dangerous Chrome APIs and hardcoded secrets, traps network exfiltration in a Chromium sandbox, flags permission creep across versions, and exports JSON reports.

CERTIFICATIONS & TRAINING

- **Advanced Software Engineering Job Simulation** | Walmart Global Tech (via Forage)
- **NxtWave Intensive AI Bootcamp** | Certificate of Participation (2026)
- **AI/ML Workshop** | Nokia, organized by TSSC Noida
- **IgNITion Techfest 2025** | Gautam Buddha University (April 2025)
- **Ignition Hackathon 2.0** | Gautam Buddha University (2026)

ACHIEVEMENTS & LEADERSHIP

- **Top 25 Teams, Tech Tank** | IgNITion Techfest 2025, Gautam Buddha University
- **Organizing Committee Member** | Intra-Institutional AI Hackathon, supporting event coordination
