ADITYA MISHRA

UG Student | Information Technology
+91-7015691250 | adityamishrav820@gmail.com | Greater Noida, UP

ABOUT ME

Passionate B.Tech Information Technology student with a strong interest in software development, AI, and problem solving. Experienced in building full-stack and AI-based projects with a focus on clean user experience and practical functionality. Interested in backend development, modern web apps, and learning new technologies.

EDUCATION

Gautam Buddha University - B.Tech Information Technology (2024-Present)
New Lahoria Sr. Sec. School - Class XII: 78.80% (2023) | Class X: 93.66% (2021)

SKILLS

Programming: Python, Java, C, JavaScript
Frontend: HTML, CSS, Bootstrap, React
Backend: Node.js, Express.js, FastAPI
Databases: MongoDB, Qdrant, Redis
AI/ML: LangChain, LangGraph, OCR, RAG
Tools: Git, GitHub, VS Code, Docker, Postman, Figma

PROJECTS

DocsMind *FastAPI, React, Qdrant, Redis, OCR, LangGraph*

- Built a document analysis platform using FastAPI, React, and Qdrant for searching and interacting with uploaded documents.
- Implemented RAG, document chunking, OCR, and hybrid retrieval to generate context-aware responses from document content.
- Integrated streaming responses, source citations, and document preview for a smoother document reading experience.
- Designed backend APIs and asynchronous document processing workflows for uploading, indexing, and querying documents.

CampusPool *MongoDB, Express.js, React, Node.js, JWT*

- Built a student ride-sharing platform for finding and sharing rides within the campus community.
- Implemented JWT authentication, role-based access control, and student verification for secure user access.
- Integrated Socket.IO and Google Maps API to support live ride updates and real-time ride matching.
- Designed REST APIs and responsive React interfaces for ride booking, trip management, and notifications.

ETCS Traffic Management System *MERN Stack, REST APIs*

- Built a traffic management system for monitoring flow.
- Integrated REST APIs for real-time updates.
- Developed modules for reporting and traffic control.
- Designed a responsive interface for tracking and management.

RELEVANT COURSEWORK

Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

ACHIEVEMENTS

- Built multiple full-stack and AI-based projects.
- Gained hands-on experience with APIs, authentication, and real-time features.
- Strong understanding of OOP, DBMS, DSA, and software development basics.
- Actively learning modern tools and technologies for web and AI development.

ADDITIONAL INFORMATION

- Comfortable working with REST APIs and automation workflows.
- Good understanding of version control and collaborative development using Git/GitHub.
- Knowledge of data handling, basic analysis, and problem solving.
- Soft Skills: Communication, teamwork, problem solving, adaptability.

LANGUAGES

Hindi (Native) | English (Professional Proficiency)
